

Glenergy

Sensible Energy Alternatives

Sunny Spring Greetings!

Quotes of the Month

"Light belongs to the heart and spirit. Light attracts people, it shows the way, and when we see it in the distance, we follow it."

-Ricardo Legorreta

"Do, or do not. There is no try!"

-Yoda

Featured Products

10 Watt LED Flood Light

These low consumption flood lights are a popular choice for customers looking to illuminate a sign, object or an open area etc. Prices from \$50.00

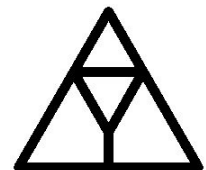

Our Mission

Glenergy's mission is to provide solar lights and power to people throughout the world, especially those who do not have access to grid electricity or who have only limited access to unreliable grids. We believe that small amounts of solar electric power (distributed with applications such as long-lived, energy-efficient LED lights) can both improve the quality of peoples lives and reduce greenhouse gas emissions.

DC-AC Pure Sine Wave Inverters - SSW Series

	Part #	Feature	Output (Watts)	Price (\$)
	SSW-30-12A	USB Charging Port	350	132.00
	SSW-600-12A	USB Charging Port	600	222.00
	SSW-1000-12A	Remote LCD Display	1000	372.00
	SSW-1500-12A	Remote LCD Display	1500	454.00
<small>FREE! LCD Remote Control SSW-R1-12</small>	SSW-2000-12A	Remote LCD Display	2000	527.00

Glenergy offers a wide variety of alternative energy system components, including: solar panels, wind turbines, batteries, inverters and charge controllers. But because every little act of green counts, we also carry a broad range of smaller-scale energy-saving products, such as:

- Solar Lamps
- 12 V DC Bulbs (LED, Compact Fluorescent, Cold Cathode Fluorescent)
- Flashlights
- Portable Solar Power
- Rechargeable Batteries
- And much more!

Find our latest [catalogue](#) of alternative energy products online at www.glenergy.ca.

In the Spotlight: Solar Box Systems

Ever find yourself wishing that all your solar energy needs could be met with one easy compact system? At Glenergy, we specialize in custom designing solar systems that fit the energy needs of our customers. Glenergy solar lighting box systems offer practical solutions for many applications and in the most remote of locations.

Glenergy has experience in designing custom lighting systems for highways, small streets, camps, cottages, boats, trailers and much more. Our customers range from

civilians to municipalities and provincial parks to churches.

For most systems, lights are paired with solar panels, charge controllers and batteries to create durable, long-lasting and environmentally responsible systems that require very little maintenance.

Email or give us a call, we can design the perfect system that's right for you.
